-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 103***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-9, 11-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al (6,417,127), for reasons of record.
3. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto et al (6,417,127) further in view of Janney et al (5,028,362), for reasons of record.

***Response to Arguments***

Applicants' argument that Yamamoto et al teach translucent bodies and not transparent is not persuasive in overcoming the rejection. The terms "translucent and transparent" are qualitative terms and typically may include bodies having the same transmittance. Applicants have not shown by way of tangible evidence, such as side by side testing in declaration or affidavit that the bodies of Yamamoto have different transmittance values than that set forth in the claims. Yamamoto et al evaluate the transmittance by total transmittance under different processing parameters however the values set forth in the examples would be expected to yield a RIT of greater than 30%. Applicants have not shown by way of quantitative evidence that the properties of the instant claims distinguish from the properties of the bodies taught by Yamamoto et al.

It is well settled that when a claimed composition appears to be substantially the same as a composition disclosed in the prior art, the burden is properly upon the applicant to prove by way of tangible evidence that the prior art composition does not necessarily possess characteristics attributed to the CLAIMED composition. ### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
